Copper Connectivity Solutions – Category 6a F/UTP

Introduction

The TrueNet® CopperTen® F/UTP Solution supports 10 Gigabit Ethernet to a full 100m. At high frequencies associated with 10 Gigabit per second transmission speeds alien crosstalk (interference between adjacent cables) hinders performance. The shielding used in the CopperTen F/UTP solution effectively eliminates all alien crosstalk allowing data transmission rates of 10 Gigabits per second.
