

GLOBAL CAPABILITIES

LOCAL SOLUTIONS

Structured Cabling Solutions for Enterprise Networks

The Foundation of Your Company's Network

Transform the delivery of your business.

Tyco Electronics enterprise cabling technologies offer proven solutions that support you globally and locally.

Are you responsible for finding network solutions that reduce energy consumption, increase performance, and offer RoHS* compliance? Do you need fast installation, increased security, innovative products, and global support?

Tyco Electronics provides all of this, and more. Our solutions are already part of your life, wherever you are, keeping you connected in the automotive, computer, consumer electronics, communication equipment, appliance, aerospace and defense, industrial machinery, and instrumentation industries. Everyday, around the world, our technologies deliver a measurable advantage to people and products.

At Tyco Electronics, we design, develop, and manufacture AMP NETCONNECT copper and fiber network systems for global and local customers like you.

Our industry leadership, OEM partners, and worldwide network of certified installers and engineers provide the solid foundation needed for today's networks.

** Restriction of Hazardous Substance Directive adopted by the European Union in 2003.*

1941 AMP Incorporated's pioneering solderless terminals improved connection consistency and fit the slogan "precision engineering on the end of a wire"

1954 The AMPOMATOR automatic crimping machine allowed users to produce thousands of quality wire terminations per hour

1966 Precisely engineered connector technology vaulted AMP Incorporated into the Fortune 500 for the first time

1975 The first commercially available single fiber connector was introduced: the AMP OPTIMATE connector

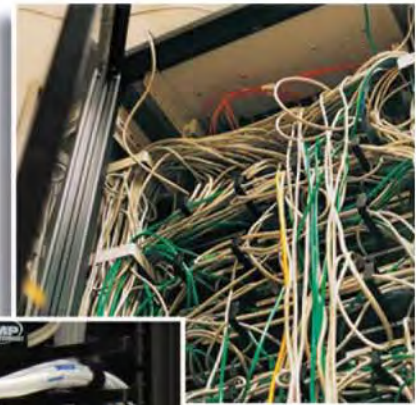

We deliver network infrastructure solutions that work.

Our advantages include:

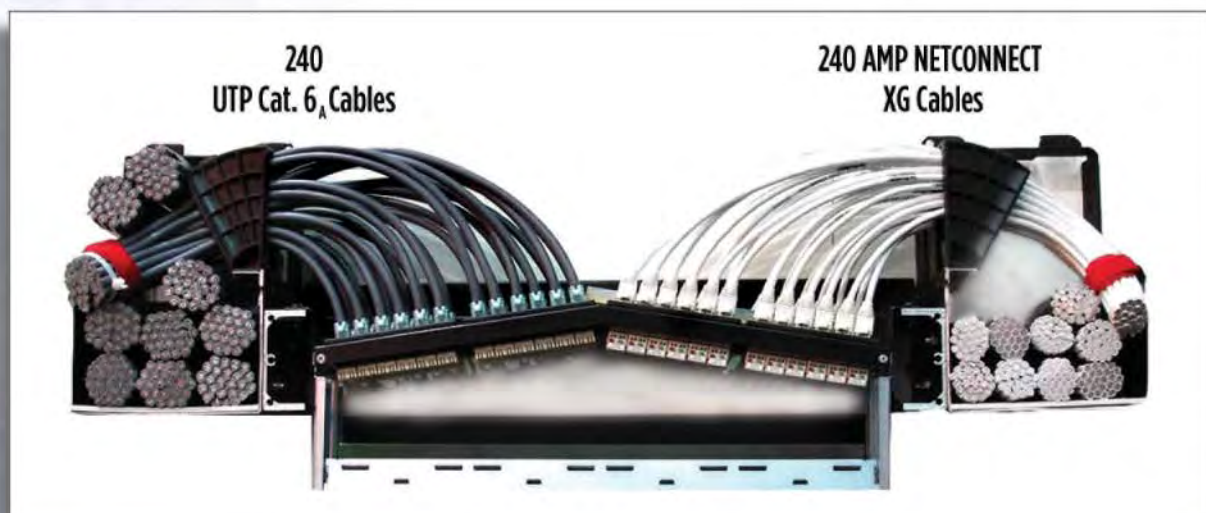

- Global Standards Compliance
- Space-Saving Design
- Time-saving Installations and Terminations
- Faster Bandwidth Deployment
- Worldwide Design, Manufacturing, Distribution, and Installation
- Environmental and Sustainability Advantages
- More Secure Networks
- Advanced Cable Management
- Reduced Network Congestion
- Reusable Pre-terminated Products
- Improved Manageability of Moves, Adds, and Changes

Tyco Electronics is globally recognized as a leader in the design and manufacturing of high-performance, reliable, end-to-end structured cabling systems. We offer one of the most comprehensive lines of copper and fiber cabling solutions in the industry.

Solutions that simplify cable management

Solutions that save cable tray space

Serving Customers through Global De

The Future is Unpredictable. Unless You're Leading It.

Tyco Electronics is a US \$14.8 billion global provider of nearly 500,000 precision-engineered and manufactured products – all backed by approximately 96,000 employees in about 50 countries with a singular commitment to bringing a performance advantage to every technology, product, and service we provide.

Technology Strength:

- In June 2008, the patent scorecard in the Wall Street Journal (WSJ) ranked Tyco Electronics technology strength among the strongest in the Electronic & Instruments industry. The technology strength ranking is based on the scale, quality, impact, and nearness to core science of a company's patent-based intellectual property.

Standards Leadership:

- With Tyco Electronics you benefit from the increased interoperability of working with a company that leads and drives industry standards for interfaces, applications, and network design.
- Tyco Electronics is affiliated with nearly 600 standards organizations worldwide and has an active or influential role in more than 250 of them, including IEEE, TIA, ISO, IEC, and Cenelec.

OEM Relationships:

- Keep your network infrastructure on the cutting edge by dealing with the world's largest supplier of passive electronic components.
- Tyco Electronics drives the evolution of connector technologies with the world's leading OEMs. So we can design AMP NETCONNECT products to anticipate and leverage future technologies, increase compatibility, and boost performance.

Global System Warranty

Tyco Electronics provides AMP NETCONNECT 25-year System and Application performance warranties to end-user clients, meeting all applicable regional and international standards. See warranty terms for conditions and exclusions.

1990 AMP Incorporated introduces the first crimpable optical fiber splice for single-mode applications

1991 LIGHTCRIMP No-Epoxy fiber connectors eliminate the need for heat ovens and increase termination yield by simplifying the termination process

1997 LIGHTCRIMP PLUS No-Epoxy No-Polish (NENP) connectors reduced termination time to about 1-minute

1999 The MT-RJ Jack product line reduces duplex fiber connectors to the size of copper RJ-45 connectors

2000 Color-coded and keyed MT-RJ SE introduced to provide the ability networks

Design, Manufacturing, and Distribution

Adapting to Country-Specific Requirements is Difficult. Unless You Have a Local Advantage.

With local knowledge and experience comes understanding. Nearly 8,000 engineers, in approximately 50 countries, understand the issues our customers are facing around the world and can develop the local networking solutions you need, wherever you choose to do business.

Local Engineering Advantage

- Customized approach for diverse end-user applications worldwide.
- Tyco Electronics is globally recognized as a leading provider of end-to-end structured cabling solutions.
- We apply our knowledge of local customs and standards to create market-specific solutions.

Local Supply Advantage

- Our products are available wherever you need them.
- Global supply chain capabilities and logistics support.
- Extensive network of industry-leading distributors to stock AMP NETCONNECT products locally in warehouses around the globe.

Local Support Advantage

- 1,700 authorized AMP NETCONNECT Network Design and Installation (ND&I) partners, located in 59 countries.
- To develop the country-specific solutions you need.

AMP products were to physically segregate

2002

The AMPTRAC intelligent infrastructure management system dramatically simplifies disaster recovery, monitoring, and management of the structured cabling physical layer

2003

PARA-OPTIX connector supports 72 fibers in a compact housing, a feat previously deemed "impossible" by industry engineers

2004

The SL Series Termination Tool drastically reduces the time required for repeatable, high performance, unshielded twisted pair terminations

2005

The MRJ21 high-performance 24-pair connector significantly reduces time and space required to install to a Gigabit Ethernet platform

Global Industries Served

Our global reach is the shortest distance between you and your local business solutions

Whether you require a new installation or an upgrade to an existing office network, data center, infrastructure management system, secure network, or 10-Gig system, the Tyco Electronics AMP NETCONNECT business offers the perfect solution.

Government Advantage

We can facilitate your desire for secure applications and compliance to global regulations.

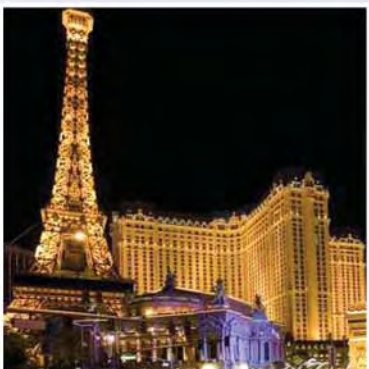

Healthcare Advantage

Effective records and communications keeps the flow of information consistent and accurate; and may even avert a crisis.

Education Advantage

Communications technology is central to today's educational environment.

Industrial Advantage

Exposure to liquids and harsh environments will happen. Make certain your network cabling is made to handle it.

Financial Advantage

Achieve real business results by partnering with us to increase uptime, improve security, and maintain records.

Hospitality and Gaming Advantage

Meet the growing demand to stay connected while maintaining your ability to stay flexible.

Retail Advantage

Increase your revenue per square foot by limiting installation time and increasing adaptability.

Because one size does not fit all, we welcome the opportunity to meet with you and discuss how we can help you deliver the network system performance you require.
